

TeamView® BusinessSMS

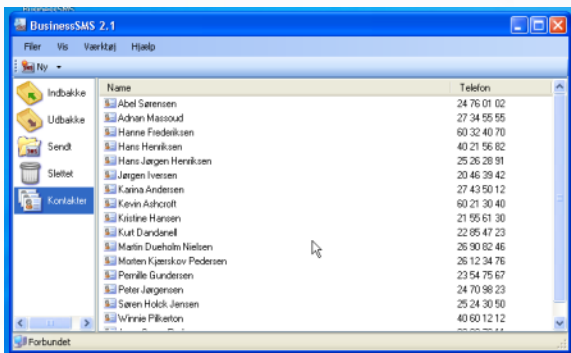

TeamView® BusinessSMS

Service applikation for Unified Operator and Office Manager (CTRL + F5)

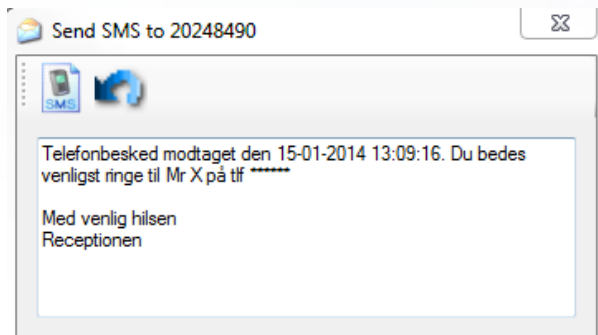

The screenshot displays the TeamView Unified Operator interface. The main window is titled "Teamview - Unified Operator" and features a toolbar with various communication icons. On the left, there are status indicators for "Hovednummer" (0 1 0) and "Sales" (0 4 2). The central area shows a customer profile for "Marlene Hansen" at "Scantalk ApS", including contact details like phone numbers (4906, 28894782), email (MHA@scantalk.com), and a description: "grafisk designer på alle Teamview produkter". A calendar view shows time slots from 10:00 to 16:00. On the right, a list of employees is visible under the "Afdeling" tab, including names like Allan Demosen, John Doe, and Kantine. In the bottom right corner, a small window titled "Send SMS to 28894782" is open, displaying a confirmation message: "Telefonbesked modtaget den 28-11-2013 09:58:14. Du bedes venligst ringe til Mr X på tlf 20460045. Med venlig hilsen Receptionen".

TeamView® Applications

Applications

As a client application can TeamView® BusinessSMS be used to write and send text messages from your PC. For this purpose are presented (and used) the application almost identical to the e-mail application.

As a service application offers TeamView® BusinessSMS following options:

Can be an integral part of the Unified Operator og Office Manager, where it is used to send text messages to employees.

Can be called from another programs with parameters.

Can be used for remote handling as a security service (parameter-controlled via SMS).
